- Innovative design specifically made for the SX-R 1500, not a runabout sponson sold for a stand-up.
- Extremely high quality 100% billet aluminum backing plates and blades. Lightweight backing plates (Only 1.8lbs per side)
- Stepped backing plates for increased grip in turns and reduced drag.
- Angled backing plate increases lean angle and positions the blades at the optimum distance from the hull.
- Blades can be positioned in six locations for rider preference and race conditions.
- Excellent straight line stability (No high speed wobbles caused by blades being too large)
- Drains machined into backing plates to avoid water from collecting.
- 100% designed and manufactured in the USA.
