Kawasaki 1100 Total Loss Flywheel

$675.00

With the increased popularity of SX-R 1100 triple cylinder conversion skis being built we are proud to bring you our light weight billet aluminum Total Loss flywheel. Â Weighing in at 2.2 pounds (stock is 4.0 pounds) you will gain a tremendous increase in acceleration and midrange powder simply by bolting this masterpiece on. Â Manufactured in house on our state of the art Mori Seiki multi task CNC machines every component of this flywheel is held to precise tolerances to ensure balance, durability and reliability. Â Compatible with Advent Ignitions you can install our flywheel and instantly feel the difference and gain that advantage on the starting line we all desire. Â Complete installation instructions and hardware are included in this kit. Â Black anodized to protect against corrosion and a custom made heat treated ring gear is designed to have years of trouble free use.
