TBM Racing Yamaha Superjet â€œSignature Seriesâ€• Ride Plate '08 - P

$399.95

When the 2008 Yamaha Superjet was released we were chomping at the bit to get our hands on one and start developing the ultimate ride plate for this exciting new ski. At first glance you may think we simply adapted our SX-R or Hydrospace ride plates to the new Yamaha, but that is far from the truth. We had to start from a clean sheet as the unique hull design coupled with the relocated pump made it challenging to find the best combination of speed, handling and straight line tracking. You will notice two features when glancing at this plate, the unique stepped tail and the four triangular holes in the middle of the plate. Both of these features coupled with a narrow tail and the TBM dual concave design make this plate a winner for any riding situation.
