TBM Racing FZR, FZS Tunable Super Scoop

\$225.95

We were the first to release a fully tunable scoop grate for the Kawasaki Ultra and now we have incorporated that same concept into our FZR, FZS Super Scoop. With extensive testing in real world conditions we are confident you won't be disappointed with our grate. Where others compromise hook up for speed, we give you the ability to adjust for the specific conditions you ride in. Whether its recreation or all out racing, this scoop does it all. You have the ability to adjust the center foil up and down or completely remove it for smooth conditions and the rear pump shoe inlet can also be adjusted by the removable rear wedge. No loss in top speed, improved handling and un-matched rough water hook up, you will go faster with more confidence regardless of your skill level.
