TBM Racing SX-R / Hydrospace S4 Front Sponsons

\$349.95

Since the inception of the first front sponsons used on the Team Kawasaki SXI Pro™s in 2001-02 there have been many renditions that have claimed to transform the handling of your stand up into something far better than what the manufacturers originally designed. The truth is many of these bulging fiberglass training wheels were designed by guys with bulging waistlines that couldn't carve a turn on a stand up to save their life. At TBM we have never pushed the use of front sponsons knowing they often create an ill handling hull in all but the roughest conditions and even then can catch a wave and send you off in one direction and your ski in another. The designers with 118, 130, 140, 149, 28, 35, 51, 79, 100, 112, 120, 135, 145, 155, 165, 175, 185, 195, 205, 215, 225, 235, 245, 255, 265, 275, 285, 295, 305, 315, 325, 335, 345, 355, 365, 375, 385,
