Reed Spacers

\$89.95

Introducing our angled reed spacers, which position the reed cages in the optimal position for fuel atomization. Key features include a full 3 degrees of angle (1 degree more than our competitors), an integrated pulse fitting, which allows you to add a second pulse line without drilling your crankcases. An easy way to bolt on an increase in acceleration and mid range power. Compatible with stock, or aftermarket cages these spacers come complete with all necessary hardware and gaskets.
