# TBM Racing Sea Doo RXP/RXT/RXPX/RXTX/Hydrospace Throttle lever

$89.95

We are proud to release the first throttle lever specifically designed to work with the 4tec Sea Dooâ€™s and Hydrospace watercrafts.Â  No more cutting holes in your grips or grinding the backside of the lever in an attempt to gain the cable pull needed to open the throttle body on these skis.Â  We redesigned the lever and pivot points to accommodate the longer cable pull needed to get full throttle while maintaining the proper ergonomics for a comfortable lever.Â  All the same great features of our standard throttle lever is incorporated into our Sea Doo/Hydrospace levers including the only lever that uses a bearing pivot to eliminate the friction and slop associated with other aftermarket levers.Â  Available in clear or black anodized finish.
