Ultra Lightweight Seat & Hood Kit

\$1 775.00

Transform your Ultra 250X/LX or 260X into a true race bred handling machine with our premier Lightweight Hood and Seat combo. This hood and seat combo weighs a combined 14.5 pounds shedding over 50 pounds from your Ultra hull. We have also lowered the rider position by 6 inches lowering the center of gravity which enhances the handling of the ski significantly. This is by far the most innovative, best fitting and lightest seat and hood on the market. Our kit comes complete with mounting hardware and Dzus fasteners for a quick removal of the hood. The seat also comes with the gasket and under mat for the seat cover. You can order the seat and hood in black primer or painted black or white.
