## **TBM Racing Billet Handle Bar Clamps (Includes Hardware)**

\$39.95

We have finally made billet bar clamps to compliment our steering system and turn plates. Not made from extruded aluminum as many clamps on the market, our clamps are made from one block of billet 6061. We also include stainless hardware with our clamps rather than charging our customers a small fortune to purchase the hardware separately. These clamps are sold as a pair and can be purchased by themselves, or as part of our sealed bearing steering system. All clamps are black anodized.
