

Kawasaki Ultra Tunable Ride Plate Trim Overrid

\$310.00

Weâ€™re excited to release our Ultra Ride Plate Trim Override Kit for those riders wishing to manually control the trim tab on our Ultra Ride Plate. This kit comes with everything you need except the actual lever. Any motorcycle clutch lever or trim lever will work with our kit. We will release our own trim lever very soon, but we did not want to delay the release of this kit for those riders and racers anxious to take advantage of this system. The innovative design of this kit uses a simple cable to actuate a linkage arm that makes two or even one finger operation at full throttle a piece of cake. Just like all TBM parts, the quality, design and innovation that went into this kit is bar none.
