TBM Racing Kawasaki SX-R 800 Signature Series Ride Plate - Race

\$399.95

After nearly 5 years of production we have finally found a way to enhance the performance of our premier SX-R ride plate by utilizing the triangular windows that Mike Klippenstein made famous on his TBM Hydrospace plate. A subtle yet very noticeable improvement these 4 windows allow water to enter over the top of the plate when chopping the throttle creating added traction and grip in the turns. This is very noticeable when passing other riders or crossing another riders wake. It is also an improvement for the recreational rider that loves going out and carving turns.
