TBM Racing Limited Spec Dome

\$96.50

When the IJSBA rulebook allowed the use of up to a .060" base gasket in the Ski Limited class we went right to work designing a dome that would accommodate this change. Just like our Standard domes our Limited Spec domes are machined from billet 7075 aluminum alloy and are hard anodized for corrosion protection. The difference in these domes is the increased step in the squish band. A .050" step optimizes the piston to dome clearance when using a .060" base gasket. If a thinner base gasket is used the dome will require machining to prevent piston to head contact. Available in 22cc, 24cc, 26cc, 27cc, 28cc, 29cc configurations.
